**Fees:**

The fee for connecting a residential stormwater line to Councils storm water system is \$450 plus an inspection fee of \$200.

With Councils permission the applicant may use a registered drain layer or Council approved drainage contractor to connect into Councils storm water system at the applicant's cost, however the connection must be inspected and approved by a Council Engineer before the trench is filled in. Failure to do so may result in immediate disconnection at the applicant's cost.

**Conditions:**

- 1 The applicant will pay all costs associated with laying and connecting from the nearest available Council drain/line to the property. In the event that the nearest drain/line is in or across the road or footpath, Council may do the work and forward the costs to the applicant, or with Council approval the work may be done by a registered drain layer or Council approved drainage contractor at the applicants cost.
- 2 The applicant must provide an approved Traffic Management Plan for all works carried out across or alongside a road or footpath.
- 3 No storm water connection shall be made into a sanitary sewer.
- 4 No connection shall be made to any Council line/drain without Council consent.
- 5 All footpath, road, or berm damaged during the works shall be reinstated to Councils satisfaction or will be repaired by Council at the applicant's expense.
- 6 The Engineer requires at least 24 hours notice for any inspection. He must also be notified before any work on or along side a road or footpath may commence.
- 7 Once completed the applicant will be responsible for the ongoing maintenance of the line between the Council connection or drain and the property.
- 8 Where the connection is provided by a developer there is no fee.
