

It's the Business!

The Kaipara District is a refuge for people who want to live an authentic life yet live less than two hours from Auckland. Some of the country's top professionals and creative people choose to live here because of the community, and the sense of liberty that comes from living in a more natural environment.

WHAT WE OFFER:

- We provide a free case management and liaison service to help people grow or establish their business.
- Advice on land and infrastructure in the district.
- Pre-planning and facilitating the resolution of problems with resource and building consent requirements.
- Help with information on raw materials planning including crop, soil and climate data for the district.
- We want to help you resolve issues and ensure you reach full production capabilities in the shortest possible time with cost savings and lifestyle benefits.

If you are relocating your business or expanding your business, please contact Chris Donahoe, Economic Development Facilitator at the Kaipara District Council.
