15A Maori Purposes: Maori Land

15A.1 Introduction / Resource Description

Maori Land is land owned by Maori and administered by the Maori Land Court under Te Ture Whenua Maori Act 1993 (Maori Land Act). It is essentially land which has never passed out of Maori ownership and is often held by a particular hapu or whanau. The term Maori Land refers to both Maori Customary Land and Maori Freehold Land. Maori Customary Land is that for which the ownership has never been determined and is accordingly not held in title. It is vested in the Crown but held by Maori and managed accordingly to tikanga Maori (traditional customs and uses). Maori Freehold Land is land owned by Maori people but is not Maori Land in the technical sense although it is sometimes administered by the Maori Land Court under Sections of the Maori Land Act. Transactions involving Maori Land are required to be dealt with by the Maori Land Court and the land cannot be removed from Maori ownership without the Court's approval.

Accordingly, Maori Land is administered and regulated under a separate system to land held in general Title. The unique nature of Maori Land is characterised by:

- Additional legislative requirements and controls under the Maori Land Act;
- Uncertainties in land succession;
- Multiple ownership;
- Difficulty in access;
- Cultural and spiritual values and the relationship of Maori to their ancestral land; and
- Land uses unique to the Maori culture.

Council is committed to working with others including government, Maori Land Court, Quotable Value NZ, other Councils and Te Puni Kokiri to find solutions to the challenges facing Maori Land. Given the unique legislative, managerial and cultural requirements of Maori Land, a separate Zone for Maori Land has been applied in the Kaipara District. Council is committed to working with others including government, Maori Land Court, Quotable Value NZ, other Councils and Te Puni Kokiri to find solutions to the challenges facing Maori Land.

Hapu and iwi consider all land within their traditional rohe to be ancestral land even though the vast majority has been progressively alienated from Maori ownership since the time of colonisation. This alienation is a major contributing factor in the position of Maori in most socio-economic statistics.

Council recognises Maori have a special relationship with their ancestral land. It is not seen in terms of its productive or commercial value alone. For Maori it is taonga tuku iho, heritage from the past for present and future generations, establishes tribal and personal identity, is a resting place for the dead and an important source of spiritual strength.

The Kaipara District contains around 230 blocks of Maori Land. They vary in size with the largest being 9,600ha which represents just over 3% of the total District Land Area. Although blocks of Maori Land are present across the District they tend to be concentrated in a few localities. These localities are Waipoua, Kaihu, Pouto, Ounawhao, Tinapai and Ouaawhoro.

15A.2 How to Use This Chapter of the District Plan

This Chapter does not specify what land uses can or cannot be done in this Zone. Instead it sets 'Standards' to make sure that the effects of activities are within an acceptable level for the Maori Land Zone (and where appropriate for the Overlay environments).

As long as the Standards are met, landowners have flexibility on what activities they do on their property. For example, Marae and Papakainga are permitted on Maori Land so long as they meet the Performance Standards for matters such as noise, density, setbacks, height, access, traffic generation, earthworks etc.

However, if someone proposes development or activities that do not meet the Standards, they will need to apply to do the work (lodge a Resource Consent). Council has an opportunity to approve or decline the Consent and to set some conditions on how the activity is done.
Figure 15A-1: How to Use this Chapter: Activity

Guide to Assessing Land Use Activities in the Maori Purposes: Maori Land Zone

Step 1: Check your proposed development against the land use performance standards (zone 6 overlay), Section 15A.10

Permitted Activity

Activity Requires Consent

Step 2: Check the ‘Activity Status’ of the performance standards infringement(s), Section 15A.10

Step 3: Prepare your Consent Application, responding to:

1. The Assessment Criteria for each land use performance standard, Section 15A.10

2. The relevant objectives and policies for this zone. How does your activity meet these? Sections 15A.5 and 15A.6

Step 3: Prepare your Consent Application, responding to:

1. The Assessment Criteria for each land use performance standard, Section 15A.10

2. The objectives and policies for this zone. How does your activity meet these? Sections 15A.5 and 15A.6

For bigger developments –

3. How does it meet the District Wide objectives and policies? Part A

4. An assessment of the Environmental Effects

Step 4: Go to Part D to confirm what financial contributions may be required and the monitoring conditions that may be imposed in a resource consent

* Standards relates to the Performance Standards of the plan.
** See also Section 13.8, as this fully describes the consent status and gives more detailed guidance on the statutory matters that must be considered when preparing a resource consent under the Resource Management Act 1991.
15A.4 Maori Land Issues

15A.4.1 Current use of Maori Land may not provide for the social and economic wellbeing of Tangata Whenua over time.

Under-utilisation of Maori Land often occurs as a result of complex tenure arrangements, a shortage of empowered kaitiaki and restricted access. A shortage of empowered kaitiaki to actively manage Maori Land does not help matters. Rules need to provide a flexible approach to enable the most sustainable land use.

15A.4.2 Marae are for the community in partnership with mana whenua and need to provide for a mix of activities to enable them to function as centres of cultural, social and economic activity. Marae are not used exclusively by Maori but are also used as meeting places, evacuation centres or social support service areas during emergencies such as floods and severe storms and as venues for a wide range of community events. A mix of activities is required to enable the marae to develop its focus as the centre of te oranga tangata (social, educational, health, cultural and economic) activities.

15A.4.3 In order for Tangata Whenua to return to their ancestral land in a safe and sustainable manner appropriate employment, housing and associated infrastructure is required. Many buildings in the Maori Land Zone are old and in disrepair, often with inadequate infrastructure. New development should address inadequacies in existing infrastructure where possible, including safe access for emergency vehicles and the effective disposal of treated wastewater. Investment in infrastructure is required as to fully realise economic opportunities.

15A.4.4 The ability of Tangata Whenua to exercise their rights under Te Tiriti o Waitangi and to be kaitiaki under the Resource Management Act 1991.

For Te Uri o Hau and Te Riona the exercise of rangatiratanga and kaitiaki through the ability to manage and care for their lands and waters and their treasures, ecosystems, waahi tapu and other taonga using their own practices and customs is paramount. Tangata Whenua have a special relationship with their ancestral lands and need a degree of autonomy as long as adverse effects beyond the boundaries of Maori Land sites are avoided, remedied or mitigated as appropriate.

15A.4.5 The ability of Tangata Whenua to utilise matauranga maori and tikanga to avoid, remedy and mitigate actual or potential effects on the environment resulting from changes in land use and development.

If not undertaken appropriately any change in land use or development has the potential for adverse effects. Maori Land policies need mechanisms for managing adverse effect on their land resulting from land use activity and development. These include rahui, used as dictated by matauranga maori (traditional environmental knowledge) and tikanga (policies, procedures and processes for implementation). These should be considered by Council when assessing applications for Resource Consent for use or development of Maori Land.

15A.5 Maori Land Objectives

15A.5.1 To enable Maori of the District to maintain and enhance their culture, traditions, economy and society, in order that their wellbeing (mauri), health (waiora) and ability to implement the Principles of the Treaty of Waitangi.

15A.5.2 To enable the development and maintenance of new and existing papakāanga and marae.

15A.5.3 To enable the use and development of Maori Land in a manner which allows Tangata Whenua to provide for their social, economic, and cultural wellbeing while safeguarding ecosystems and sustaining important sites and resources.

15A.6 Maori Land Policies

15A.6.1 By encouraging the settlement and utilisation of Maori Land in accordance with matauranga maori and tikanga. Traditional environmental practices such as rahui, used as dictated by matauranga maori (traditional environmental knowledge) and tikanga (policies, procedures and processes for implementation) have been used by Tangata Whenua to guide settlement patterns in the Kaipara District for centuries. The active use of these practices will also support the improvement of cultural knowledge and wellbeing between generations and the concept of Maori kaitiakitanga over the land.

15A.6.2 To provide Tangata Whenua the opportunity to establish papakāanga and marae as they consider appropriate, subject to compliance with relevant Performance Standards, particularly Health and Safety Standards, while ensuring that the physical needs of the settlement, in terms of access, water supply and stormwater and wastewater disposal can be met without adverse effects on the environment.

Papakāanga and marae, can be designed and managed in a manner that avoids remedies or mitigates effects external to the site. Appropriately designed papakāanga and marae are necessary for Maori to be re-associated with their ancestral lands. Existing papakāanga and marae need to be able to expand and existing housing stock to be upgraded or replaced as families return home. By returning control of internal design, amenity and living environments as far as possible to Tangata Whenua, and assessing any effects on amenity generally in terms of effects beyond the boundaries of the site, Council will provide Tangata Whenua with the opportunity to exercise their kaitiakitanga over their lands.

15A.6.3 By recognising existing and future marae as central and essential to Maori culture, tradition, society and economy and of benefit to the District as a whole.

Marae on Maori Land are central to Maori culture and recognition of the role they play in this regard is of national importance in Part 2 of the Resource Management Act 1991. They play an important part in supporting the social and cultural wellbeing of Maori.

15A.6.4 By providing assistance to landowners to protect and enhance sites, resources and features of cultural value (e.g. waahi tapu, tauranga waka, mahinga kai, mahinga mātauranga, and taonga raranga).

Providing for the protection and enhancement of sites, resources and features of cultural value is important to Maori and the wider community. This policy will be effective during the development of land containing aspects of value to Maori where proactive dialogue between Council and iwi concerning the protection and management of valued resources and features will be initiated.

15A.6.5 By providing for a range of activities, particularly where they can demonstrate a better environmental outcome than the existing land use, including enhancement of significant habitats and sites (e.g. waahi tapu) and protection of important values and characteristics.

Tangata Whenua desire improved environmental outcomes during development of Maori Land. This will be achieved through Resource Consent conditions that are respectful of traditional practices and access to incentives such as the biodiversity fund.

15A.6.6 By empowering kaitiaki to monitor the environmental effects of Maori Land use and development using culturally appropriate mechanisms and processes.

Monitoring the effects of established development is an important part of providing Maori with Kaitiakitanga over Maori Land. This gives Tangata Whenua more flexibility and autonomy in managing the effects of established development on their land. Kaitiakitanga is of high importance to Tangata Whenua and specifically provided for in the Resource Management Act 1991.

15A.6.7 By providing flexibility for use and development of Maori Land that results in a pattern and density of land use appropriate to the locality (including sensitive receiving environments and neighbours) and in accordance with matauranga maori and tikanga.

Kaitiakitanga is also further provided for when utilising traditional practices in the development of Maori Land. This gives Tangata Whenua more flexibility and autonomy in managing their land. This is of high importance to Tangata Whenua and specifically provided for in the Resource Management Act 1991.

15A.7 Methods

The above Policies will be implemented through the following Methods:

15A.7.1 District Plan Methods

15A.7.1.1 The use of Rules which provide for papakāanga and marae expansion, upgrade and development, subject to compliance with relevant Performance Standards and Assessment Criteria.

15A.7.1.2 The use of Rules which allow for a range of activities within the Maori Land Zone, subject to compliance with relevant Performance Standards and Assessment Criteria.

15A.7.1.3 Conditions imposed on approved Resource Consents where appropriate.

15A.7.1.4 Completion Certificates, issued under Section 222 of the Resource Management Act 1991 for the completion of works (e.g. works to provide or upgrade service facilities).

15A.7.1.5 Ongoing monitoring of approved Resource Consent requirements.
15A.7.2 Other Methods

15A.7.2.1 Provide information on values associated with properties e.g. landscapes, cultural, ecological sites etc.

15A.7.2.2 Promotion of voluntary protection mechanisms regarding heritage, cultural, ecological and landscape areas/items (e.g. Biosecurity Fund and Heritage Assistance Fund) as identified in the Kaipara District Council’s Annual Plan and Long Term Plan.

15A.7.2.3 Educational material/guidelines that demonstrate methods for avoiding, remediying or mitigating potential adverse effects of subdivision and development.

15A.7.2.4 The Kaipara District Council Engineering Standards 2011.

15A.7.2.5 Industry Codes of Practice or Environmental Manuals relevant in the Maori Land Zone, which can be used as guidelines for setting conditions on Resource Consents.

15A.7.2.6 Assistance with investigations into the sustainable utilisation of Maori Land.

15A.7.2.7 Requirements under other legislation, including:
- Local Government Act 2002;
- Local Government (Rating) Act 2002;
- Building Consents under the Building Act 2004;
- National Environmental Standards;
- Kaipara District Council Bylaws;
- Te Uri o Hau Claims Settlement Act 2002; and

15A.7.2.8 Other relevant documents:
- The Kaipara Long Term Plan;
- Historic Places Act 1993;
- Regional Plans / Policy Statements;
- Kaipara District Council Reserves and Open Space Strategy;
- Te Uri o Hau Deed of Settlement 2000;
- Te Roroa Deed of Settlement 2005;
- Draft Te Roroa Iwi Environmental Policy Document 2008; and
- Memoranda of Understanding with Te Uri o Hau and Te Roroa.

15A.7.2.9 Providing access to geological databases:
- Inventory and Maps of Important Geological sites and Landforms in the Northland Region shown on the NZ Land Inventory NZMS 290 (1996);
- Use of Climate, Soil and Crop Information for Identifying Potential land-Use Change in the Hokianga and Western Kaipara Region (2003).

15A.8 Maori Land Outcomes

15A.8.1 The ability for re-association of Tangata Whenua with ancestral land.

15A.8.2 Maori Land is utilised in a sustainable and culturally appropriate manner.

15A.8.3 The cultural values associated with Maori Land are protected and enhanced.

15A.8.4 Maori Land is appropriately developed to provide suitable buildings served by effective infrastructure.

15A.8.5 Maori Land is developed in a way that provides for the social, economic and cultural benefit of Tangata Whenua.

15A.9 Maori Land Rules

15A.9.1 Permitted Activities

The following activities shall be Permitted in the Maori Land Zone:

a) Any activity complying with the Performance Standards listed in Section 15A.10 of this Chapter; and

b) Any activity which is not identified elsewhere in this Plan as a Controlled, Restricted Discretionary, Discretionary or Non-Complying Activity.

15A.9.2 Controlled Activities

The following activities shall be Controlled in the Maori Land Zone:

a) Any activity that does not meet any Performance Standard listed in Section 15A.10 that is listed as a Controlled Activity; and

b) Any activity which does not meet any Performance Standard listed in Section 15A.10 of this Chapter and is listed as a Controlled Activity.

15A.9.3 Restricted Discretionary Activities

The following shall be Restricted Discretionary Activities in the Maori Land Zone:

a) Any activity which does not meet any Performance Standard listed in Section 15A.10 of this Chapter and is listed as a Restricted Discretionary Activity.

Note 1: Activities will be assessed against, and conditions may be imposed in relation to, those specific matters for assessment of the activity listed in Sections 15A.10 of this Chapter and the relevant Objectives and Policies that relate to the matters for which discretion has been restricted.

15A.9.4 Discretionary Activities

The following shall be Discretionary Activities in the Maori Land Zone:

a) Any activity which does not meet any Performance Standards listed in Section 15A.10 of this Chapter and is listed as a Discretionary Activity.

Applications for Discretionary Activities will be assessed against, but not restricted to, the assessment criteria listed in Section 15A.10 of this Chapter and the Objectives and Policies of this Chapter.

15A.9.5 Non-Complying Activities

No activity shall be Non-Complying in the Maori Land Zone.
### 15A.10 Performance Standards Maori Land

| 15A.10.1a | Excavation and Fill | Subject to the exclusions in (7) below, Excavation and fill is a Permitted Activity if: a) The site is not within any area known to be erosion prone, subject to instability, or flood hazards; and b) All bare earth areas, including excavation and fill batter faces within a site, are revegetated or stabilised within 6 months of the earthworks being completed; and c) All revegetated areas within a site are maintained and managed so as to achieve 80% ground cover within 24 months of the earthworks being completed; and d) The site is not located within an Outstanding Natural Landscape, identified on Map Series 2. (1) Maori Purposes: Maori Land Zone a) The works are within 6m of the bank of any lake, river or edge of any wetland and the volume is less than 1,000m³ and the area is less than 1,000m² in any 12 month period; or b) The works are located a minimum of 6m from the bank of any lake, river or edge of any wetland and the volume is less than 5,000m³ within a site, in any 12 month period; (2) East Coast and West Coast and Harbour Overlays a) The works are within 300m of the CMA and/or within 20m of a lake, river or edge of any wetland and the volume is less than 300m³ and the area is less than 300m² in any 12 month period; or b) The works are not within 20m of the bank of any lake, river or edge of any wetland and the volume is less than 2,500m³ and the area is less than 2,500m² in any 12 month period; and c) The height or depth is less than 2m over a continuous distance of less than 50m within a site. (3) Kaipara Harbour Overlay a) The works are within 300m of the CMA and/or within 20m of a lake, river or edge of any wetland and the volume is less than 1,000m³ and the area is less than 1,000m² in any 12 month period; or b) The works are not within 20m of the bank of any lake, river or edge of any wetland and the volume is less than 2,500m³ and the area is less than 2,500m² in any 12 month period; and c) The height or depth is less than 2m over a continuous distance of less than 50m within a site. (4) Mangawhai Harbour Overlay a) The works are within 300m of the CMA and/or within 20m of a lake, river or edge of any wetland and the volume is less than 300m³ and the area is less than 300m² in any 12 month period; or b) The works are not within 20m of the bank of any lake, river or edge of any wetland and the volume is less than 1,000m³ and the area is less than 1,000m² in any 12 month period; and c) The height or depth is less than 2m over a continuous distance of less than 50m within a site. (5) Kai Iwi Lakes Overlay a) The works are not within 6m of the bank of any lake, river or edge of any wetland and the volume is less than 150m³ and the area is less than 150m² in any 12 month period; and b) The height or depth is less than 2m over a continuous distance of less than 50m within a site. (6) Except that the following are Permitted Activities throughout the Maori Land Zone, including Overlays: Restricted Discretionary Activity

Where an activity is not permitted by this Rule, Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:
- Whether Building Consent has been issued and has already assessed the proposed earthworks (in such cases the matters considered under the Building Act 2004 will not be reconsidered here);
- Machinery to be used and hours of operation;
- Effects on the locality, particularly the character and amenity values of adjoining sites/land uses;
- Effects on ecological values and in particular any Sites of Ecological Significance as defined by the criteria listed in Appendix 25G;
- Effects of excavation related traffic on the safety and efficiency of the road network and on the amenity of dwellings on adjoining land;
- Effects on landscape and heritage values;
- The extent to which the proposal will affect the values of any Outstanding Natural Landscape identified in Map Series 2;
- The extent to which the works meet the requirements of the performance standards in Rule 15A.10.1a or the Kaipara District Council Engineering Standards 2011;
- Effects of dust and noise on sensitive receivers;
- If located in an Overlay, the extent to which the values identified in the Objectives and Policies for Overlays (Chapter 4) are present on the site, and the extent to which the proposal is compatible with those values;
- Effects on cultural and heritage values (as defined in Chapter 17), including any consultation has been undertaken with Tangata Whenua as appropriate;
- The consistency of the proposal with relevant Objectives and Policies contained in Part A and Part C of the Plan with managing the values of the District including but not limited to those outlined in Chapters 2, 6.7.8 and 17;
- Any effects on the integrity of the electricity transmission line; and
- The volume, area and location of the works, including temporary activities such as:
  - Stockpiles;
  - Timing of the works;
  - Site remediation;
  - The use of mobile machinery near transmission line which may put the line at risk;
  - Compliance with New Zealand Electrical Code of Practice 34:2001; and
  - Outcomes of any consultation with any relevant network operator.
In granting any Consent under this Rule, Council will require (as a Condition on that Consent) an Excavation and Fill Management Plan to be lodged by the Consent Holder, which is to contain the following information (to the satisfaction of Council):
- Details of the location and form of earthworks proposed on a site, including volume, area affected and height of any excavation or fill;
- A plan showing relevant existing and proposed contours and location of any adjacent bush shrub land and wetland areas, water bodies and the Coastal Marine Area;
- An assessment of the site’s ecological, landscape amenity and heritage values, including details on any recorded archaeological sites and registered historic places, historic areas and wahi tapu, and the need for an archaeological-historic places site survey of the area to be developed;
- Measures directed at mitigating any adverse effects of the activity on the ecological, heritage and landscape values of the site, adjacent watercourses and the Coastal Marine Area;
15A.10.1b Excavation and Fill in an Outstanding Natural Landscape

For the purposes of this rule a Development Plan shall include:

- xiii) A scale map showing the area to be mined or quarried and including surface contours, hydrologic features, the location of buildings and other structures and spoil disposal or top soil stockpiling, areas and/or buildings to be used for retailing, reading, parking, vehicle wash-down, surface drainage patterns and sedimentation or other detention ponds or berms, the location of any scheduled items from this Plan and the landscape sensitivity of the site;
- xiv) The anticipated volume of material to be removed from or brought to the mine or quarry on a monthly and annual basis and the number of truck movements to and from the site;
- xv) The estimated number of people, including employees, on site and services and buildings for them;
- xvi) The number of parking spaces provided on site, and total number of vehicle movements to and from the site on an average daily basis;
- xvii) The methods for controlling erosion and sedimentation on site;
- xviii) The staging of the mine or quarry;
- xix) The methods and staging for rehabilitating the site as mining or quarrying is completed including the species of vegetation to be used and a landscaping plan, and identification of any structures or buildings to be removed or to remain permanently on the site and the resulting contour and drainage pattern of the rehabilitated land and the distance from public viewing;
- xx) The methods to be employed to control the effects of dust and debris on site;
- xxi) The methods to be employed to control the effects of noise and vibration on site;
- xxii) A statement giving details of consultation, including consultation with Tangata Whenua, which was carried out and the results of that consultation, including any written approval to the Development Plan by neighbouring landowners;
- xxiii) Method of containing tailings.

Except that this rule does not apply to a quarry or mine defined by “normal rural practice".

Note 1: A report may be required by a suitably qualified engineer to demonstrate that the work will not have an adverse effect on downstream or upstream flooding.

Note 2: Any relevant operator of the Electricity Transmission Network will be considered an affected party in relation to any Resource Consent Applications.

Note 3: Applicants will be encouraged as part of preparing a consent application under this Rule to consult with affected landowners.

Note 4: A description of the landscape features is provided in Appendix 18A. The values associated with the Outstanding Natural Landscapes are described in the Kaipara District Landscape Technical Report (2010).

Note 1: A description of the landscape features is provided in Appendix 18A. The values associated with
### 15A.10.2a

**Indigenous Vegetation Clearance**

Subject to the exceptions provided in (5) below, clearance or removal of indigenous vegetation outside an overlay area is a Permitted Activity if:

1. **Maori Purposes: Maori Land Zone**
   a) It is not located within an *indigenous wetland*; and
   b) It is not part of:
      i) a continuous area of predominantly indigenous vegetation over 5 hectares in area; or
      ii) a continuous area of predominantly indigenous vegetation greater than 6m in height and over 1 hectare in area;
   c) It is not located within a site identified in Appendix F (Kiwi Density) of the District Plan; and
   d) It is not located within an Outstanding Natural Landscape as identified in Map Series 2.

2. **East Coast and West Coast and Kaipara Harbour Overlays**
   a) It is not located within an indigenous wetland; and
   b) It is not part of:
      i) a continuous area of predominantly indigenous vegetation over 1 hectare in area; or
      ii) a continuous area of predominantly indigenous vegetation greater than 6m in height and greater than 1,000m² in area; and
   c) It is not located within an Outstanding Natural Landscape as identified in Map Series 2.
   d) It is not located within a site identified in Appendix F (Kiwi Density) of the District Plan.

3. **Mangawhai Harbour Overlay:**
   a) It is not located within an indigenous wetland; and
   b) It is not part of:
      i) a continuous area of predominantly indigenous vegetation over 1 hectare in area; or
      ii) a continuous area of predominantly indigenous vegetation greater than 3m in height and greater than 500m² in area; and
   c) It is not located within a site identified in Appendix F (Kiwi Density) of the District Plan; and
   d) It is not located within an Outstanding Natural Landscape as identified in Map Series 2.

4. **Kai Iwi Lakes Overlay**
   a) It is not located within an indigenous wetland; and
   b) It is not part of:
      i) a continuous area of predominantly indigenous vegetation over 1 hectare in area; or
      ii) a continuous area of predominantly indigenous vegetation greater than 3m in height and greater than 500m² in area; and
   c) It is not located within a site identified in Appendix F (Kiwi Density) of the District Plan; and

#### Assessment Criteria

- **Restricted Discretionary Activity**
  Where an activity is not permitted by this Rule, Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:
  i) Extent of vegetation clearance proposed relative to total vegetated area;
  ii) Whether any affected area of indigenous vegetation is naturally occurring or has been artificially created;
  iii) Effects on the locality, particularly the rural character and amenity values;
  iv) Effects on ecological values and in particular its significance as a site of ecological significance or by reference to the criteria listed in Appendix 25G;
  v) Whether and the extent to which revegetation using eco-sourcing of native plants is proposed as part of the development;
  vi) Effects on landscape and heritage values;
  vii) The extent to which the proposal will affect the values of any Outstanding Natural Landscape identified in Map Series 2;
  viii) Effects on water bodies, including wetlands and particularly sensitive receiving environments of the harbours and lakes;
  ix) The ecological significance of the indigenous vegetation or individual indigenous tree and associated presence of rare or endangered flora and fauna including kiwi as shown in Appendix F to the District Plan Maps;
  x) The extent to which the activity may adversely affect cultural and spiritual values;
  xi) The form and ecological value of remaining vegetation, including edge effects, retention of corridors and relationship to the natural landscape;
  xii) The extent to which any proposed measures will result in the protection and enhancement of the ecological values of the area;
  xiii) The relationship of the vegetation to any adjacent conservation covenant and whether it contributes to an ecological corridor;
  xiv) The relevant provisions of the Kaipara District Council Reserves and Open Space Strategy;
  xv) If located in an Overlay, the extent to which the values identified in the Objectives and Policies for Overlays (Chapter 4) are present on the site, and the extent to which the proposal is compatible with those values;
  xvi) The consistency of the proposal with the relevant Objectives and Policies contained in Part A and Part C of the Plan managing the values of the District, including but not limited to Chapters 2, 3, 6, 7, 8 and 17; and
  xvii) The extent to which the activity will affect any heritage values identified in Appendix 17.1 and 17.2 of the Plan.

**Note 1:** A description of the landscape features is provided in Appendix 18A. The values associated with the Outstanding Natural Landscapes are described in the Kaipara District Landscape Technical Report (2010).

</table>

**Note 1:** The Regional Water and Soil Plan for Northland contain minimum Standards for erosion and sediment control resulting from land disturbance. Vegetation clearance activities may require a Resource Consent from the Northland Regional Council under those provisions. Applicants should contact the Northland Regional Council to confirm whether or not a Consent is required.

**Note 2:** Where parallel Resource Consent for vegetation removal is required from the Northland Regional Council, Kaipara District Council will seek to undertake joint processing of both applications, e.g. via delegated authority from the Northland Regional Council.

**Note 3:** For the purpose of clarity the standards of this Rule for the Maori Land Zone apply to Overlays unless alternative standards are explicitly stated.

**Note 4:** An area of predominantly indigenous vegetation is an area where the vegetation cover is at least 75% indigenous.

</table>
| 15A.10.2b | Indigenous Vegetation Clearance in an Outstanding Natural Landscape | The provisions in this chapter prevail over the Resource Management (National Environmental Standards for Planation Forestry) Regulations 2017 in relation to plantation forestry activities.  
(1) Subject to the exceptions provided in (1) below, clearance or removal of indigenous vegetation within an Outstanding Natural Landscape is a Permitted Activity if:  
a) It is not located in an indigenous wetland; or  
b) It is not part of:  
i. a continuous area of predominantly indigenous vegetation over 1 hectare in area; or  
ii. a continuous area of predominantly indigenous vegetation greater than 3m in height and greater than 500m² in area.  
(2) Except that the following are Permitted Activities, and are excluded from the Standards of 15A.10.2b:  
a) The removal is in accordance with an existing use right; or  
b) The total clearance within a site is no more than 500m² where the clearance is for the express purpose of providing a house site and / or access to a house site, or is to provide access to existing farming or forestry activities; or  
c) The clearance is for the maintenance of any open or clear space within an area defined by 20m of an existing dwelling or building; or  
d) The removal is of trees that are a danger to human life or existing structures (including network utilities); or  
e) The removal is for the formation and maintenance of walking tracks less than 1.5 metres in width; or  
f) The clearance is for maintenance of existing fence lines or for a new fence where the purpose of the new fence is to exclude stock and/or pests from an area which is to be protected for ecological or soil conservation purposes, provided that the clearance does not exceed a width of 3.5m either side of the fence line; using manual methods that do not require the removal of any indigenous tree over 300mm girth; or  
g) It is part of the operation and maintenance of network utilities, or is necessary to protect electrical lines required to meeting the Electricity (Hazards from Trees) Regulations 2003;  
h) The clearance is for the creation and maintenance of firebreaks; or  
i) The vegetation or tree comprises the understorey directly beneath exotic or native plantation forest and the activity is carried out as part of forestry operations; or  
j) It is in accordance with the terms of a Queen Elizabeth II National Trust, or other covenant, or forest sink, covenant under the Forests Act 1949, or the trees have been planted specifically for forestry or cropping purposes, or the removal is limited to naturally dead or with forestry operations, if the company has Forest Stewardship Council certification or another third party certified environmental management system; or  
k) The vegetation clearance is on land which has been previously cleared and where the indigenous vegetation to be cleared is less than 10 years old.  
Note 1: The Regional Water and Soil Plan for Northland contain minimum standards for erosion and sediment control resulting from land disturbance. Vegetation clearance activities may require a Resource Consent from the Northland Regional Council under those provisions. Applicants should contact the Northland Regional Council to confirm whether or not a Consent is required.  
Note 2: Where parallel Resource Consent for vegetation removal is required from the Northland Regional Council, Kaipara District Council will seek to undertake joint processing of both applications, e.g. via delegated authority from the Northland Regional Council.  
Note 3: An area of predominantly indigenous vegetation is an area where the vegetation cover is at least 75% indigenous. | Discretionary Activity | Where an activity is not permitted by this Rule, Council will have regard to the following matters when considering an application for Resource Consent:  
i) The matters for which it has limited its discretion listed under Rule 15A.10.2a; and  
ii) The extent to which the proposal will affect the values of any Outstanding Natural Landscape identified in Map Series 2 and the extent to which the subdivision, use or development meets the additional assessment criteria contained in Appendix 18B.  
Note 1: A description of the landscape features is provided in Appendix 18A. The values associated with the Outstanding Natural Landscapes are described in the Kaipara District Landscape Technical Report (2010). |
### Rule 15A.10.3a Dwellings (excluding Papakainga)

**Maori Land Permitted Activity Performance Standard**

Construction of a *dwelling* is a Permitted Activity if:

- After completion, it will be the only dwelling on the site; or
- It will be an additional dwelling on the site, and there is a minimum of 4ha of net site area associated with each dwelling in the Maori Purpose Zone; or
- It will be an additional dwelling on the site, where:
  - there is a minimum density of 4 ha of net site area associated with each dwelling in the Maori Purpose Zone, which is calculated over more than one site; and
  - the sites used to calculate the minimum density requirement (other than the site on which the additional dwelling is built) are subject to a covenant protected by a registered first ranking encumbrance, in a form that is to the satisfaction of Council.

**Activity Status if the Activity does not meet the Performance Standard**

Discretionary Activity

**Assessment Criteria**

Where an activity is not permitted by this Rule, Council will have regard to the following matters when considering an application for Resource Consent:

- **Building location**, including alternatives considered;
- Size and shape of the site;
- Extent of visual intrusion of the building from beyond the Maori Land Zone, particularly from the road and public places including the Coastal Marine Area and the effect on skylines and ridgelines;
- The extent to which proposed landscaping is consistent with the character of the area, provides screening from adjoining public places and *dwellings* in the Rural Zone and is in accordance with any adopted Design Guidelines;
- Effects on the locality, particularly the rural character and amenity values;
- If located within an Overlay, the extent to which the values identified in the Objectives and Policies for Overlays (Chapter 4) are present on the site, and the extent to which the proposal is compatible with those values;
- Effects on landscape and heritage values;
- The extent to which the proposal will affect the values of any Outstanding Natural Landscape identified in Map Series 2;
- Effects on safety and efficiency of vehicles and pedestrians using the site and affected roads and private ways; and
- The extent to which the activity will affect any heritage values identified in Appendix 17.1 and 17.2 of the Plan.

**Note 1:** This Rule also applies to buildings relocated on site.

**Note 2:** The demolition and/or removal of a dwelling is a Permitted Activity except where the provisions of Chapter 17: Historic Heritage apply and subject to the Building Act.

**Note 3:** Each dwelling is also required to be assessed against the relevant Performance Standards contained in the Plan, including within Section 15A.10.

**Note 4:** Clause 1b) above will not apply if there is an encumbrance on the property in accordance with 1d) of this Rule.

**Note 5:** Clause 1d) is intended to provide for additional dwellings to be clustered on a farm (to support the primary activities on the site), where that farm is held in more than one title.

**Note 6:** An example form encumbrance to the effect that no dwelling shall be built on a site as required by clause d(ii) above is available from Council.

**Note 7:** For dwellings within an Outstanding Natural Landscape, Rule 15A.10.3c shall also apply.

### Rule 15A.10.3b Dwelling Infrastructure

**Maori Land Permitted Activity Performance Standard**

(1) Construction of a dwelling is a Permitted Activity if:

- Minimum floor levels are designed in accordance with the following Standards:
  - Floor levels for habitable buildings are designed with a minimum freeboard height to floor level of 500mm above the 100 year Average Recurrence Interval floor level; and
  - In addition to the minimum floor level any new dwelling shall be:
    - 5.0m above mean sea level in the West Coast and East Coast Overlays; or
    - 3.0m above mean sea level in the Mangawhai Harbour Overlay; or
    - 3.5m above mean sea level in the Kaipara Harbour Overlay; or
    - 3.5m above mean sea level in Dargaville as defined by the Drainage District boundary as at 31 October 2009.
  - Where a Council water supply is available:
    - The written approval of Council’s asset manager is obtained and provided with the application to confirm that the Council water supply can be extended to serve the dwelling;
    - All dwellings are provided, within their net site area, with a connection to the Council water supply; and
    - The water supply is designed and constructed in accordance with the specific requirements of the Council water supply system; and
    - All water pipelines vested with Council shall be protected by an Easement in favour of Council.

**Activity Status if the Activity does not meet the Performance Standard**

Discretionary Activity

**Assessment Criteria**

Where an activity is not permitted by this Rule, Council will have regard to the following matters when considering an application for Resource Consent:

- Whether there is sufficient control of water-borne contaminants, litter and sediment;
- Whether there is sufficient land available for disposal of stormwater;
- Whether and the extent to which the capacity of the downstream stormwater system is able to cater for increased runoff from the proposed allotments;
- Whether and the extent to which measures are necessary in order to give effect to any drainage or Catchment Management Plan that has been prepared for the area;
- Whether and the extent to which measures proposed for avoiding or mitigating the effects of stormwater runoff, including low impact design principles are effective;
- Whether and the extent to which the water infrastructure within the site, is able to link with existing disposal systems outside the site;
- Whether and the extent to which the development meets the relevant Performance Standards or the Kaipara District Council Engineering Standards 2011;
- Whether the development represents the best practicable option in respect of the provision that is made for the disposal of stormwater;
- In tidal areas, allowance should be made for the effects of high tide, waves, storm surges and rising sea levels;
- Whether and the extent to which there is sufficient land available for wastewater treatment and disposal on site;
- Whether and the extent to which the application includes the installation of all new reticulation, and

* Note: where the above provisions do not apply the general provisions of the District Plan apply.

15A.10.4 Papakainga

Construction of **papakainga** is a **Permitted Activity** if:

a) The papakainga comprises no more than 10 individual units **per site**;
b) Each papakainga unit meets the Performance Standards of Section 15A.10; and
c) The standards of 15A.10.3b are met.

**Note 1:** This Rule also applies to buildings relocated on to site.

**Note 2:** For dwellings within an Outstanding Natural Landscape, Rule 15A.10.3c shall also apply.

**Restricted Discretionary Activity**

Where an activity is not permitted by this Rule, **Council** has restricted its discretion over the following matters when considering and determining an application for Resource Consent:

i) **Building** location, including alternatives considered;

ii) Size and shape of the **site**;

iii) Extent of visual intrusion of the building from beyond the Maori Purposes Zone, particularly from the road and public places including the **Coastal Marine Area** and the **effect** on skylines and ridgelines when viewed from outside Maori Purposes Zoned land;

iv) Effects on the locality of the adjoining rural land, particularly the rural character and amenity values and those values associated with Overlay Areas (as identified in the objectives and Policies for Overlays, Chapter 4);

v) Effects on landscape and heritage values;

vi) The extent to which the proposal will affect the values of any Outstanding Natural Landscape identified in Map Series 2 and if applicable the extent to which the subdivision, use or development meets the additional assessment criteria contained in Appendix 18B; and

vii) The extent to which the activity will affect any heritage values identified in Appendix 17.1 and 17.2 of the Plan.

**Note 1:** General assessment of the Kaipara District Council Engineering Standards 2011 is
### Rule 15A.10.5 Commercial and Industrial Buildings

For Commercial or Industrial Activities in the Maori Land Zone, any building is a Permitted Activity if:

- The gross floor area of the building does not exceed 1000m²; and
- The building is able to comply with the relevant Performance Standards of Rule 15A.10;
- Where no Council wastewater system is available the On Site Treatment and Disposal systems shall be designed and constructed in accordance with AS/NZS 1547:2008 "Onsite Wastewater Management Standards";
- Where no Council wastewater system is available applicants shall demonstrate that any effluent discharges comply with the requirements of the Regional Water and Soil Plan for Northland (or Consent for discharges from the Northland Regional Council has been obtained);
- Where no Council reticulated stormwater disposal system is available the development shall comply with Rule 15A.10.3(i).

**Note 1:** Any discharge into land, air or waterbodies may require a Resource Consent from the Northland Regional Council. The Regional Water and Soil Plan for Northland contain minimum Standards for wastewater and stormwater treatment drainage and disposal and the Regional Coastal Plan controls buildings and structures in the Coastal Marine Area. Applicants should contact the Northland Regional Council to confirm whether or not a Resource Consent is required.

**Note 2:** This Rule also applies to buildings relocated on to site.

**Note 3:** For dwellings within an Outstanding Natural Landscape, Rule 15A.10.3c shall also apply.

### Assessment Criteria

Where an activity is not permitted by this Rule, Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:

- **Building location**, including alternatives considered;
- **Size and shape of the site**;
- **Extent of visual intrusion of the building from beyond the Maori Land Zone, particularly from the road and public places including the Coastal Marine Area and the effect on skylines and ridgelines**;
- **Proposed landscaping in accordance with any Council adopted Design Guidelines**;
- **Whether and the extent to which the building and activity is compatible with the locality, particularly the rural and natural character and amenity values**;
- **If located within an Overlay, the extent to which the values identified in the objectives and policies for Overlays (Chapter 4) are present on the site, and the extent to which the proposal is compatible with those values**;
- **Effects on landscape and heritage values**;
- **The extent to which the proposal will affect the values of any Outstanding Natural Landscape identified in Map Series 2 and if applicable the extent to which the subdivision, use or development meets the additional assessment criteria contained in Appendix 18B**;
- **Effects on the safety and efficiency of vehicles and pedestrians using the site and affected roads and private ways**;
- **Safety of the building and people using it during flood events or tidal inundation including possible ingress during flood events or tidal inundation**;
- **The extent to which the development complies with the requirements of the relevant Performance Standards or the Kaipara District Council Engineering Standards 2011**; The extent to which the stormwater generated from permeable surfaces associated with the building may contribute to erosion or a reduction in the water quality of the receiving environment;
- **Whether a sustainable potable water supply is able to be provided to service the development**;
- **The extent to which the activity will affect any heritage values identified in Appendix 17.1 and 17.2 of the Plan**.

**Note 1:** A description of the landscape features is provided in Appendix 18A. The values associated with the Outstanding Natural Landscapes are described in the Kaipara District Landscape Technical Report (2010).

### Rule 15A.10.6 Maximum Height

For Commercial or Industrial Activities in the Maori Land Zone, any building is a Permitted Activity if:

- The building does not exceed 10m in height, where it is not within an Overlay Area; or
- The building does not exceed 8m in height, where it is within an Overlay Area.

**Note 1:** For dwellings within an Outstanding Natural Landscape, Rule 15A.10.3c shall also apply.

### Assessment Criteria

Where an activity is not permitted by this Rule, Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:

- **The scale and bulk of the building in relation to the site**;
- **The functional requirements of the building**;
- **The extent to which the effects of the height infringement beyond the Maori Land Zone can be mitigated by setbacks, planting, design or the topography of the site**;
- **Effects on the locality, particularly the rural character and amenity values**;
- **If located within an Overlay, the extent to which the values identified in the objectives and policies for Overlays (Chapter 4) are present on the site, and the extent to which the proposal is compatible with those values**.
### Rule 15A.10.7 Height in Relation to Boundary

**Notes:**
- Refer to Chapter 24: Definitions for the definition of *Recession Plane.*

### Rule 15A.10.8 Setbacks

**Notes:**
- For clarification, if the average bed width is less than 1m this rule does not apply and if the average is greater than 3m the Rule 15A.10.8(1)(d) above applies.

|          |                                                     | iii) The extent to which the effects beyond the Maori Land Zone of the height in relation to boundary infringement can be mitigated by setbacks, planting, design or the topography of the site;  
|          |                                                     | iv) Effects on the locality, particularly the rural character and amenity values;  
|          |                                                     | v) If located within an Overlay, the extent to which the values identified in the objectives and policies for Overlays (Chapter 4) are present on the site, and the extent to which the proposal is compatible with those values;  
|          |                                                     | vi) Effects on availability of sunlight to other properties; and  
|          |                                                     | vii) The extent to which the proposal will affect the values of any Outstanding Natural Landscape identified in Map Series 2 and if applicable the extent to which the subdivision, use or development meets the additional assessment criteria contained in Appendix 18B.  
|          |                                                     | Note 1: Where an activity is not permitted by this Rule, Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:  
|          |                                                     | i) The outlook and privacy of adjacent and adjoining neighbours in the Rural Zone;  
|          |                                                     | ii) Extent of visual intrusion and dominance of any buildings from beyond the Maori Land Zone, particularly from the road and public places including the Coastal Marine Area and the effect on skylines and ridgelines;  
|          |                                                     | iii) Whether proposed landscaping is in accordance with any relevant Council adopted Design Guidelines;  
|          |                                                     | iv) Effects on adjoining Rural Zoned land, particularly the rural and natural character and amenity values;  
|          |                                                     | v) If located within an Overlay, the extent to which the values identified in the objectives and policies for Overlays (Chapter 4) are present on the site, and the extent to which the proposal is compatible with those values;  
|          |                                                     | vi) Effects on landscape and heritage values;  
|          |                                                     | vii) The extent to which the proposal will affect the values of any Outstanding Natural Landscape identified in Map Series 2 and if applicable the extent to which the subdivision, use or development meets the additional assessment criteria contained in Appendix 18B;  
|          |                                                     | viii) Effects on ecological values and in particular any sites of ecological significance as defined by the criteria listed in Appendix 25C;  
|          |                                                     | ix) Effects on public access;  
|          |                                                     | x) Effects on natural hazards, including the design and construction of hazard protection works on land adjacent to the Coastal Marine Area, rivers and lakes;  
|          |                                                     | Note: For clarification, if the average bed width is less than 1m this rule does not apply and if the average is greater than 3m the Rule 15A.10.8(1)(d) above applies. |
### Chapter 15A - Maori Purposes - Maori Land

<table>
<thead>
<tr>
<th>Rule</th>
<th>Parameter</th>
<th>Maori Land Permitted Activity Performance Standard</th>
<th>Activity Status if the Activity does not meet the Performance Standard</th>
<th>Assessment Criteria</th>
</tr>
</thead>
</table>
| 15A.10.9 | Permeable Surfaces | (1) For any site of Sha or less, an activity is a Permitted Activity if:  
- In any one hectare, the area of any site covered by buildings and other impermeable surfaces is less than 15% in the Maori Land Zone where it is not within an Overlay; and  
- In any one hectare, the area of any site covered by buildings and other impermeable surfaces is less than 10% in the Maori Land Zone where it is within an Overlay.  
(2) For any site over Sha in size, an activity is a Permitted Activity if:  
- Water collected from impermeable surfaces is disposed of on-site or discharged to an existing watercourse.  
Note 1: The intention of this Rule is to avoid large areas of continuous seal / hardstand.  
Note 2: Discharge consents may be required from the Northland Regional Council. | Restricted Discretionary | Where an activity is not permitted by this Rule, Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:  
i) Control of stormwater run-off;  
ii) The effects of increased stormwater flows downstream;  
iii) Methods of attenuating stormwater flows to pre-development rates;  
iv) Whether and the extent to which the activity meets the relevant Performance Standards or the Kaipara District Council Engineering Standards 2011;  
v) Effects on water quality; and  
vi) The extent to which low impact design principles are utilised. |
| 15A.10.10 | Separation Distance for Noise Sensitive Activities in the Maori Purposes: Maori Land Zone | Any noise sensitive activity including marae or papakaiinga (as defined in Chapter 24: Definitions) is permitted if a 300m separation is maintained between the noise sensitive activity and activities listed as follows on a site under separate ownership:  
a) Sewerage treatment or other site of plant or animal effluent storage or disposal (excluding domestic disposal systems);  
b) Building used for an industrial activity;  
c) Intensive feed lot or feed storage area;  
d) Intensive farming;  
e) Dairying shed;  
f) Mining or quarrying; and  
g) Any other activity that has existing use rights or Resource Consent to exceed the General Noise, Use of Explosives and Blasting Standards, or a Discharge Consent relating to odour from the Regional Council.  
Note 1: This Rule is intended to protect the opportunity for rural activities. As such, if there is an existing lawfully established activity as listed in a) to g) above, then a noise sensitive activity wishing to develop would be required to maintain the appropriate separation from this to avoid future land use conflicts. | Restricted Discretionary Activity | Where an activity is not permitted by this Rule, Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:  
i) The extent to which alternative locations have been considered;  
ii) Mechanisms in place to avoid future reverse sensitivity conflicts (including covenants on titles) or other physical mitigation works;  
iii) Effects on the health and safety of the community;  
iv) Any consultation with relevant property owners or occupiers; and  
v) How the activity contributes to the Objectives and Outcomes of the Plan, particularly Chapters 15A and 2. |

### Rule 15A.10.17 Traffic Intensity

**Any activity is permitted if the cumulative traffic generated on any road does not exceed:**

- 60 daily one way movements based on the Traffic Intensity Factor Guidelines in Appendix 25F. Except that single dwellings, temporary military activities and construction traffic (associated with the establishment of an activity) are exempt from this standard.

**Note 1: Traffic Intensity factor** guidelines are included in Appendix 25F of this Plan and can be used to calculate the likely traffic generation of particular activities. The Traffic Intensity Factor is based on the average daily one way traffic movements for a particular activity (and therefore allows for seasonal variations). Applicants may be required to apply to the Council for a Certificate of Compliance where an activity has the potential to generate 50 or more daily one way movements.

**Note 2:** As part of an application for Certificate of Compliance or Resource Consent under this Rule Council may request that a Traffic Impact Assessment prepared by a suitably qualified Traffic Engineer be provided.

**Note 3:** This calculation only applies when establishing a new activity on a site. However, the Traffic Intensity Factor for the existing uses on site (apart from those exempted below) will be taken into account when assessing new activities in order to address cumulative effects.

### Rule 15A.10.18 Potentially Contaminated Land

**Removing or replacing a fuel storage system, sampling the soil, disturbing the soil and Change of land use**

- Activities and construction traffic

**Activity Status if the Activity does not meet the Performance Standard:**

<table>
<thead>
<tr>
<th>Time</th>
<th>Maximum Weighted Vibration Level (Wb or Wd)</th>
<th>Maximum Instantaneous Weighted Vibration Level (Wb or Wd)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Monday to Saturday</td>
<td>0.045 m/s²</td>
<td>1.0 m/s²</td>
</tr>
<tr>
<td>7:00am - 6:00pm</td>
<td></td>
<td></td>
</tr>
<tr>
<td>All other times</td>
<td>0.015 m/s²</td>
<td>0.05 m/s²</td>
</tr>
</tbody>
</table>

**Assessment Criteria:**

- Effects on character and amenity beyond the site;
- Alternative methods to avoid vibration generation; and
- Mitigation measures to reduce vibration generation.

**Restricted Discretionary Activity**

Where an activity is not permitted by this Rule, Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:

- The time of day when any extra vehicle movements will occur;
- The distance between the location of vehicle movements and adjacent properties;
- The width and capacity of any road to be able to cope safely with vehicle movements;
- The effect of traffic on the amenity and character of the surrounding area;
- The effect of changing capacity on the amenity and character (including natural character) of the adjoining Rural Zone;
- The nature of the surface (sealed or otherwise) on the adjoining road network;
- The potential for dust nuisance to be generated from the site and its effects on adjoining properties and prevailing wind direction;
- The safety and efficiency of vehicle access onto the road;
- The volume and speed of traffic on the roads affected;
- The hierarchy of the roads affected;
- Any congestion or safety issues on roads affected;
- The type and number of vehicles expected to access the site;
- The vehicle crossing layout;
- Financial contributions for road upgrading;
- The requirements of the Kaipara District Council Engineering Standards 2011; and
- The effects of any new activity or development on the State Highway Network.
<p>| Rule   | Parameter                          | Maori Land Permitted Activity Performance Standard                                                                                                                                  | Activity Status if the Activity does not meet the Performance Standard                                                                 | Assessment Criteria                                                                                                                                                                                                 |

| 15A.10.19 | Contaminated Land Remediation     | Any activity is a Permitted Activity if Remediation of contaminated land:                                                                                                           | Discretionary Activity                                                                                                                                                                                                                                                                                                                                                                                   |
|        |                                   | a) Does not cause a greater risk to the environment than if the work was not done; and                                                                                            | Where an activity is not permitted by this Rule, Council will have regard to the following matters when considering an application for Resource Consent:                                                                                                                                                                                                                                                         |
|        |                                   | b) Disposes of removed material in a location approved for the receipt of such material; and                                                                                         | i) The extent and nature of any contamination of land or ground water and the potential sources of contamination;                                                                                                                                                                                                                                                                                             |
|        |                                   | c) Is reported to the Council by the landowner at the completion of the work detailing:                                                                                               | ii) The degree to which earth moving or removal will be undertaken, including any methods to control the release of contaminants into the environment (e.g. sediment control, site covering and dust control);                                                                                                                                                                                                                   |
|        |                                   | - The work done and the results obtained; and                                                                                                                                       | iii) Whether contaminated or potentially contaminated soil or ground water will be able to be treated or disposed of;                                                                                                                                                                                                                                                                                       |
|        |                                   | - The nature and location of remaining contaminated material on site; and                                                                                                              | iv) The degree to which measures will be employed to avoid remedy or mitigate any adverse effects on water quality or the receiving environment;                                                                                                                                                                                                                                                                       |
|        |                                   | - As-built plans and specifications of any permanent containment structure.                                                                                                            | v) Whether the land is suitable for its intended end use;                                                                                                                                                                                                                                                                                                                                                   |
|        |                                   | d) The Resource Management (National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health) Regulations 2011 do not apply to the activity. | vi) Whether the methodology by which the land will be remediated will avoid, adverse effects on the natural environment, during and after the remediation process, giving special consideration to the nature of the downstream receiving environment including marine protected areas;                                                                                                                                                                                                                         |
|        |                                   | Note 1: For the avoidance of doubt, this rule does not address the actual or potential adverse effects of contaminants in soil on human health, which is covered by the Resource Management (National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health) Regulations 2011. Remediation activities relating to land that is contaminated or potentially contaminated, because of its past, present or likely use of that land for an activity or industry described in the Ministry for the Environment’s Hazardous Activities and Industries List (HAIL) may require a land use consent under the Regulations. | vii) The extent to which the effects of remediation are acceptable; and                                                                                                                                                                                                                                                                                                                                  |
|        |                                   |                                                                                           | viii) Whether adequate measures will be taken to ensure the safe operation of the proposal on the land.                                                                                                                                                                                                                                                                                                      |
|        |                                   |                                                                                           | Note 1: Reference to the Ministry for the Environment’s Contaminated Land Management Guidelines No.’s 1-5 will assist applicants in achieving compliance with the criteria set out above.                                                                                                                                                                                                                               |
| 15A.10.20 | Hazardous Substances              | Any activity is a Permitted Activity if:                                                                                                                                             | Discretionary Activity                                                                                                                                                                                                                                                                                                                                                                                   |
|        |                                   | a) The aggregate quantity of hazardous substances of any hazard classification managed as part of the activity is less than the quantity specified in Appendix 25D (Hazardous Substances – Permitted Quantities Table 1); or | Where an activity is not permitted by this Rule, Council will have regard to the following matters when considering an application for Resource Consent:                                                                                                                                                                                                                                                         |
|        |                                   | b) The hazardous substances stored or used on the site are:                                                                                                                         | i) The proposed site and layout, with a description of the nature and scale of the proposed facility and associated operations;                                                                                                                                                                                                                                                                               |
|        |                                   | i. Trade waste in a wastewater or waste treatment facility; or                                                                                                                      | ii) Location, type and quantities of hazardous substances involved;                                                                                                                                                                                                                                                                                                                                       |
|        |                                   | ii. Road materials within a road reserve; or                                                                                                                                       | iii) Site drainage and off-site infrastructure (e.g. drainage type and capacity);                                                                                                                                                                                                                                                                                                                                                                                 |
|        |                                   | iii. Domestic storage and use of consumer products for domestic purposes; or                                                                                                          | iv) Identification of on-site hazards, failure modes and exposure pathways from the proposed facility including a description of the environment potentially affected;                                                                                                                                                                                                                                           |
|        |                                   | iv. Consumer products, held for resale to the public and stored in the manufacturers’ packaging; or                                                                            | v) Transport of hazardous substances on and off the site, mode and route selection;                                                                                                                                                                                                                                                                                                                                                                                      |
|        |                                   | v. Gas or oil pipelines and ancillary equipment; or                                                                                                                                  | vi) The sensitivity of the surrounding human, natural and physical environment, and proposed measures to protect them (including wildlife habitats and water bodies);                                                                                                                                                                                                                                       |
|        |                                   | vi. Fuel or safety equipment in motor vehicles, aircraft, ships, boats or small engines; or                                                                                           | vii) Separation distances from water bodies, coastal water, neighbouring activities and people potentially at risk from the hazardous facility, including consideration of the proximity to people-oriented activities (e.g. child care, education facilities, rest homes, hospitals);                                                                                                                                                                                                                      |
|        |                                   | vii. Small fireworks subject to the Hazardous Substances (Fireworks) Regulations 2001, or safety ammunition, in domestic quantities; or                                                   | viii) Potential cumulative or synergistic effects, within the site and the locality;                                                                                                                                                                                                                                                                                                                                                                                    |
|        |                                   | viii. Fire-fighting substances on emergency vehicles; or                                                                                                                             | ix) The presence or otherwise of natural hazards which could adversely influence the inherent risks from a hazardous facility to the environment;                                                                                                                                                                                                                                                                                                                                   |
|        |                                   | ix. Electricity transformers, capacitors and switches up to 600 litres; or                                                                                                          | x) The extent to which alternative locations and methods have been considered;                                                                                                                                                                                                                                                                                                                                                                                       |
|        |                                   | c) The activity is a service station with a maximum storage for retail sale of any or all of 100,000 litres of petrol in underground storage tanks; 50,000 litres of diesel in underground storage tanks; 6 tonnes of LPG (single vessel storage); and | xii) Hazard and risk analysis;                                                                                                                                                                                                                                                                                                                                                                           |
|        |                                   | d) Storage or use of hazardous substances complies with Appendix 25D (Hazardous Substances – Permitted Conditions Table 2).                                                                 | xiii) Management of wastes containing hazardous substances;                                                                                                                                                                                                                                                                                                                                              |
|        |                                   |                                                                                           | xiv) Proposed contingency measures and emergency plans;                                                                                                                                                                                                                                                                                                                                                |
|        |                                   |                                                                                           | xv) Proposed monitoring and maintenance schedules; and                                                                                                                                                                                                                                                                                                                                                 |
|        |                                   |                                                                                           | xvi) Any consultation, assessment or responses received from the New Zealand Fire Service.                                                                                                                                                                                                                                                                                                                                                                             |</p>

| 15A.10.21 | Radioactive materials | Any activity is a Permitted Activity if:  
a) Radioactivity is below that specified as an exempt activity in the Radiation Protection Regulations 1982; or  
b) Radioactive materials are confined to domestic appliances. | Controlled Activity if:  
a) Radioactivity does not exceed 100 terabequerels.  
Discretionary Activity if:  
b) Radioactivity exceeds 100 terabequerels. | Where an activity is not permitted by this Rule, the following are the matters over which the Council reserves its control:  
i) The proposed site and layout, with a description of the nature and scale of the proposed facility and associated operations;  
ii) Location, type and quantities of hazardous substances involved;  
iii) Site drainage and off-site infrastructure (e.g. drainage type and capacity);  
iv) Identification of on-site hazards, failure modes and exposure pathways from the proposed facility including a description of the environment potentially affected;  
v) Transport of hazardous substances on and off the site, mode and route selection;  
vi) The sensitivity of the surrounding human, natural and physical environment, and proposed measures to protect them (including wildlife habitats and water bodies);  
vii) Separation distances from water bodies, coastal water, neighbouring activities and people potentially at risk from the hazardous facility, including consideration of the proximity to people-oriented activities (e.g. child care, education facilities, rest homes, hospitals);  
viii) Potential cumulative or synergistic effects, within the site and the locality;  
ix) Hazard and risk analysis;  
x) Management of wastes containing hazardous substances;  
xi) Proposed contingency measures and emergency plans;  
-xii) Proposed monitoring and maintenance schedules; and  
xiii) Any consultation, assessment or responses received from the New Zealand Fire Service. |
| 15A.10.22 | Lighting and glare | Any activity is permitted if between the hours of 22:00 and 07:00 any artificial lighting does not exceed 100 lux, measured at any point on boundary of any Residential Zoned site or at the national boundary of any Rural or Maori Purpose Zoned site. | Restricted Discretionary Activity | Where an activity is not permitted by this Rule, Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:  
i) The orientation, strength, intensity, colour, or frequency of flashing of the light;  
ii) Effects on traffic and pedestrian safety;  
iii) The separation distances from neighbouring activities and people, including consideration of the proximity of people-oriented activities (e.g. rest homes or hospitals);  
iv) Effects on amenity and character of the surrounding area; and  
v) Proposed monitoring and maintenance schedules. |
| 15A.10.23 | Signage (including signs on and adjacent to roads and on buildings) | The following signs are Permitted:  
c) Any business sign not exceeding 3m² that is not within an Outstanding Natural Landscape (identified on Map Series 2), advertising or providing information on the owner or occupier of the site, or facilities, goods or services available from it, provided that no more than two such signs shall be erected on any site; and  
c) Any public sign providing information on facilities and services of public interest erected by, or with the written approval of, any heritage protection authority, local authority, Minister of the Crown or requiring authority, or any sign created by or with the written approval of the abovementioned authorities for the purposes of carrying out its statutory functions; and  
d) Any temporary sign not exceeding 3m², advertising or providing information on any central or local government elections, cultural, social or sporting events, sites for development, sale or auction, provided that any such sign shall only be erected for a period of up to two months and shall be removed within seven days of the election, event, sale or auction taking place.  
Provided the following conditions are met:  
e) No sign, other than a public sign or verandah sign, shall be displayed or erected on or over any road reserve unless the consent of Council is obtained; or  
Restricted Discretionary Activity | Where an activity is not permitted by this Rule, Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:  
i) The visual impact of the sign and the effect on the amenity of the locality and surrounding area (including consideration of proposed lighting / illumination of the sign);  
ii) The number and location of other signs in the local vicinity;  
iii) The extent to which the sign is likely to unduly distract or restrict motorists vision or interfere with the effective functioning of any traffic sign;  
iv) The extent to which the sign is likely to unduly effect pedestrian safety;  
v) The likely cumulative visual effect of allowing the sign to be erected;  
v) Whether the sign is visible from the State Highway, and if so that approval from the NZ Transport Agency has been obtained;  
 vii) The extent to which the sign provides information on facilities and services of public interest;  
viii) The extent to which the sign is relevant to activities occurring on the subject site;  
ix) Whether and extent to which any adverse effects on traffic safety can be mitigated through the appropriate positioning or placement of the sign on a site; and  

### Vehicle Access and Driveways

| 15A.10.24 | Vehicle Access and Driveways | Any activity is permitted if:  
- The owner or occupier of each site shall provide and maintain at all times adequate access for emergency vehicles and vehicles generally associated with activities on site;  
- For new vehicle crossings on to State Highways, all NZ Transport Agency engineering requirements have been satisfied; or for vehicle crossings on to roads controlled by Kaipara District Council, all council engineering requirements have been satisfied (e.g. Kaipara District Council Engineering Standards 2011);  
- Where a loading ramp is required it shall not be located within 25m of the edge of a traffic lane;  
- Each site shall be provided with an maintain a driveway to the following Standard: Formed with an all-weather surface;  
  - For driveways of greater than 100m, a passing bay shall be provided no further apart than 1 per 100m;  
  - For a driveway servicing up to 6 dwellings, the minimum width of 3.0m and for between 7 and 30 dwellings a minimum width of 5.5m and for more than 30 dwellings a width of 6m;  
  - The maximum gradient shall be 1:5 for sealed and 1:8 for gravel driveway;  
  - Shall include internal manoeuvring area sufficient that vehicles using the driveway do not need to reverse onto a road or shared driveway (in accordance with 90th percentile vehicle manoeuvring figures in Appendix 25C: Parking, Loading and Manoeuvring Standards);  
  - Access and manoeuvring areas shall comply with the New Zealand Building Code acceptable solutions C/AS1 Part 8.1 (Fire Service Vehicular Access 2010);  
  - Where a private driveway is gated, the gates shall be located at least 13m from the edge of the public road corridor (with an 80 or 100km/h speed limit) where the gate opens into the site or 13m plus the gate width where it opens towards to road; unless onto a State Highway (where gate setbacks may be higher and are required to be complied with);  
  - All gated accesses shall be provided with turning provisions, such that a 90th percentile car may enter the driveway and turn around, without passing the gates or affecting through traffic on the public road; and  
  - Stormwater drainage for at least a 10% AEP rainfall event sufficient that surface ponding does not occur and discharge from the driveway does not result in adverse effects to adjoining properties or roads. | x) The extent to which the proposal will affect the values of any Outstanding Natural Landscape identified in Map Series 2 and if applicable the extent to which the subdivision, use or development meets the additional assessment criteria contained in Appendix 18B. | Note 1: A description of the landscape features is provided in Appendix 18A. The values associated with the Outstanding Natural Landscapes are described in the Kaipara District Landscape Technical Report (2010). |
| | | e) The site is not within an Outstanding Natural Landscape, as identified in Map Series 2, unless the work is necessary for the maintenance of existing accesses or firebreaks. | Restricted Discretionary Activity | Where an activity is not permitted by this Rule, Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:  
- Whether and to the extent to which the road, private way or property access complies with the Kaipara District Council Engineering Standards 2011 or has been confirmed as appropriate by Council’s engineer;  
- The provision of safe, practical access for all persons and vehicles likely to need access to the site, including pedestrian, cycle, disabled, vehicular;  
- The expected vehicle operating speeds and methods of controlling vehicle speeds;  
- The ease of access to and from, and within, the site;  
- Adequacy of sight distances at the vehicle crossing and along the access;  
- Possible measures or restrictions on vehicle movements in and out of the access;  
- Possible adverse effects on Council infrastructure or adjoining properties;  
- The provision made to mitigate the effects of stormwater runoff, and any impact of road and access on waterways, ecosystems, drainage patterns or the amenities on adjoining properties;  
- Any traffic safety or congestion problems in the area;  
- Any foreseeable future changes in traffic patterns in the area;  
- If a new access is being provided or modification of an existing access onto a State Highway, or on sites that have access over a railway line, whether the consent of the NZ Transport Agency or New Zealand Railways Corporation is obtained;  
- Whether and the extent to which the design of vehicle accesses and driveways meets the requirements of the NZ Building Code acceptable solutions C/AS1 Part 8.1 (Fire Service Vehicular Access 2010); and  
- The extent to which the proposal will affect the values of any Outstanding Natural Landscape identified in Map Series 2 and if applicable the extent to which the subdivision, use or development meets the additional assessment criteria contained in Appendix 18B. |

Note 1: Where land adjoins a limited access road under the Government Roading Powers Act 1989 access to and from that road is subject to restrictions and controlled by the NZ Transport Agency.

Note 2: Any changes in land use on sites that have access over a railway line require approval from the New Zealand Railways Corporation under the New Zealand Railways Corporation Act 1981.

Note 3: Council will confirm engineering approval for Council controlled roads, as per clause (b) above, of the vehicle access and driveways by compliance with the Kaipara District Council.

| 15A.10.25 | Fire Safety | Any building is permitted if:  
   a) It does not impede the movement of fire service vehicles or equipment or generally restrict access for fire fighting purposes;  
   b) The dwelling(s) should be at least 20m away from scrub, woodlot or forestry; and  
   c) That a fire sprinkler system is installed in accordance with either the:  
      - NZS 4517:2010 (Fire Sprinkler Systems for Houses); or  
      - NZS 4541:2013 (Automatic Fire Sprinkler Systems); or  
      - NZS 4515:2009 (Fire Sprinkler Systems for Life Safety in Sleeping Occupancies up to 2,000m²)  
   d) That a sufficient water supply is provided if a sprinkler system is not being installed. | Restricted Discretionary Activity | Where an activity is not permitted by this Rule. Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:  
i) The accessibility for fire service vehicles, taking into account a risk-based assessment. |
| 15A.10.26 | Parking | Any activity is permitted if:  
   a) The owner or occupier of each site provides and maintains at all times spaces for the off-street parking of cars and other vehicles generally associated with activities on the site.  
   b) The number of parking spaces to be provided shall meet the minimum requirements outlined in Appendix 25C: Parking, Loading and Manoeuvring Standards.  
   c) Each parking space shall be formed and maintained so that the maximum gradient on any area used for parking and manoeuvring shall be 6%; and  
   d) Parking spaces may be situated within a building provided the Council is satisfied that the spaces can be clearly defined and made available for parking at all times. The area of any parking spaces and associated access within a building shall be excluded from the gross floor area of that building for the purposes of assessing the total number of spaces required.  
   e) Any parking spaces required under the provisions of the District Plan are to be sited at least 15m from the banks of any river or stream, whose bed has an average width of 3m or more, any lake with an area greater than 8ha or the Coastal Marine Area or any mapped wetway or wetland in the Valued Natural Environments of Mangawhai, except where appropriate provision is made for the collection treatment and disposal of stormwater from the areas to a Council approved stormwater system or other approved outlet.  
   f) Each parking space shall have adequate physical access to a road, street or service lane and the buildings or uses to which it is intended to serve. It shall be provided with such access drives and aisles as are necessary for safe and convenient movement of vehicles to and from the street or service lane for the manoeuvring of vehicles within the site in accordance with the Figures in Appendix 25C: Parking, Loading and Manoeuvring Standards.  
   g) Control of Access - Any parking area associated with a Commercial or Industrial activity which adjoins a street shall be provided with a fence, kerb, nib or similar non-mountable barrier not less than 0.15m high along those parts of the site's frontage not used for access purposes. The barrier shall be designed to prevent vehicles entering or leaving the parking area other than by the access drives or aisles provided.  
   h) Control of Reversing - All parking areas shall be designed so that all vehicles can enter and leave the site in a forward gear and do not have to reverse onto or off the adjacent road or street.  
   i) Screening of Parking Areas - Any parking area which is adjacent to a Residential Zone shall be screened from residential sites by landscaping, fencing or other suitable screening at least 1.8m in height. Any landscaping is to be provided and maintained in such a manner. | Restricted Discretionary Activity | Where an activity is not permitted by this Rule. Council has restricted its discretion over the following matters when considering and determining an application for Resource Consent:  
i) The nature of street or service lane access available to the proposed parking and/or loading facilities;  
ii) The provision which can be made for parking and/or loading facilities for the proposed land use on an adjacent site;  
iii) The adequacy of public parking and/or loading facilities in the immediate vicinity of the site;  
iv) The nature of any special landscaping or pedestrian design features to be developed on the site;  
v) The hours of operation of the proposed use and number of staff employees on shift work;  
vi) The size and number of vehicles expected to use the site;  
vii) Whether and the extent to which the proposed parking area is designed, constructed and adequately drained in accordance with the Performance Standards in Rule 15A.10.26 or the Kaipara District Council Engineering Standards 2011; and  
viii) The extent to which the proposal will affect the values of any Outstanding Natural Landscape identified in Map Series 2 and if applicable the extent to which the subdivision, use or development meets the additional assessment criteria contained in Appendix 18B. In granting any application the Council may require as a Condition of Consent either that:  
x) The parking and/or loading spaces required be provided on other available sites in the immediate neighbourhood; or  
x) A cash contribution is paid to the Council for the purchase of land and/or the construction of suitable parking and/or loading facilities.  
Note 1: Any cash contribution required by the Council shall not exceed the value of a sufficient part of the site or building to accommodate the vehicles for which provision is required, and the associated cost of their construction.  
Note 2: A description of the landscape features is provided in Appendix 18A. The values associated with the Outstanding Natural Landscapes are described in the Kaipara District Landscape Technical Report (2010).
