Applicant's Changes since lodgement are identified as highlighted.

S42A Addendum interim changes are identified as highlighted

Insert new Precinct Section into Chapter 13 – between 13.9 and 13.10

PREC1 AWAKINO PRECINCT

McGrath's planning EIC)

Description of Awakino Precinct

The Awakino Precinct enables medium density residential development for a range of allotment sizes where ecological enhancement, open space and connectivity corridors are achieved. The Awakino Precinct integrates with the Residential Zone to provide for a variety of residential intensities that promote housing and living choices whilst recognising the natural features and characteristics of the area. The Residential Zone provides for traditional suburban densities and housing forms which is currently characterised by one to two storey detached residential units on larger properties setback from boundaries with landscape gardens.

Objectives	
PREC1-01	Awakino Precinct Density
	tunities and housing choice is enabled in the Awakino Precinct whilst ecological,
reverse sensitivity, storn	nwater, and transport and character and amenity effects are managed.

Policies						
PREC1-P1	Awakino Precinct Subdivision					
-	les for a range of site sizes and densities, and subdivision layout where: nent sizes is provided that have the ability to accommodate different housing					
typologies.						
	infrastructure to accommodate the development.					
	s sympathetic to the surrounding environment and adverse effects on adjoining sites					
are managed, inclu	are managed, including reverse sensitivity effects.					
4. <u>Good design of sub</u>	pdivision is achieved by the following:					
a. <u>Urban blocks</u>	that respond to topography, solar orientation, prevailing winds and are flexible to					
deliver a rang	e of typologies.					
b. Lots are gene	rally shaped, sized and orientated to achieve positive sunlight access, onsite amenity,					
privacy and o	utlook, with particular regard to east – west orientation.					

		onnected, safe and legible transportation and open space networks, including ycling corridors.
		and open space networks are well connected, legible and safe.
		of rear lots is minimised, except where there is no practicable alternative.
		th adjacent sites to enable future development opportunities.
PREC		Awakino Precinct Residential Amenity
		cts on residential amenity and character by requiring residential activities to have
	to the way the dev	
1. <u>I</u>	Provides street activ	
		on of building mass towards the street;
		l physical connection between principal pedestrian access and the street; nection from windows overlooking the street to create passive surveillance.
		andscaping and fencing treatments at the interface with the Rural Zone, natural
1		twork and other open space.
v	7. <u>Relates to</u>	neighbouring properties by employing setbacks, sensitive building orientation and d landscaping to mitigate dominance and privacy impacts.
v		afe and active interface to open space networks and road corridors onto which it
	fronts.	
v		recognise the amenity and character of the street and other buildings in the vicinity,
	having reg	ard to building bulk, scale and mass.
PREC	<u>C1-P3</u>	Awakino Precinct Connectivity
<u>i</u> 2. <u>H</u> 3. <u>H</u> <u>a</u>	s no practical altern Establishing connect Establishing a visual precinct that accom and connects parks,	nected street network, that avoids no exit roads and cul-de-sacs, except where there native. ctions along and between the existing wetland features and open spaces. ally distinct, high amenity road (the Green Road) providing connection within the modates separated cycle infrastructure with restricted vehicle access along one side open space and the freshwater network and terrestrial habitats. g and cycling networks along streets, waterways and open space.
PREC	<u>C1-P4</u>	Awakino Precinct Ecological Values
indiger particu 1. <u>N</u> 2. <u>N</u>	nous vegetation v ular regard to: Maintaining the into Method of enhance	values of all natural wetland features, intermittent and permanent streams, and vithin the Awakino Precinct when undertaking land use and subdivision, with erconnected network between the natural features. ment and permanent protection of the natural features; and k of residential activities.
PREC	<u>C1-P5</u>	Awakino Precinct Open Space
Reauit	re subdivision with	in the Awakino Precinct to provide for the recreation and amenity needs of residents
<u>by:</u>		ces which are prominent and accessible and are of a quality and size in proportion to
		f the neighbourhood.
		strian and /or cycle linkages.
		features, mature trees and ecological areas into the design of subdivisions through
<u> </u>	open spaces where	they can contribute to recreation networks and/or maintain ecological values.
PREC	2-P6	Awakino Precinct Stormwater Management
Ensur	e that stormwater	is managed and treated to:
-		ance the health and ecological values of the wetlands and streams.
		mitigate hazards, taking climate change into account. associated with climate
e	change.	

Amendments to Chapter 13 – 13.10 Performance Standards Residential Land Use

 Residential Permitted Activity Performance Standard (1) Construction of a <i>dwelling</i> is a <i>Permitted Activity</i> if: a) After completion, it will be the only dwelling on the <i>site</i>: or b) It will be an additional dwelling on the site, and the minimum <i>net site area</i> associated with each additional dwelling is: 600m² for a <i>serviced site</i> not in an Overlay Area; or 1,000m² for a serviced site in an Overlay Area; or 3,000m² for an un-serviced site. c) There is a separation distance of at least 3m from any other detached dwelling; and d) There is a separation distance of at least 6m where there is a private open space area located between two residential dwellings. Note 1: The <i>demolition</i> and/or removal of a dwelling is a Permitted Activity except where the 	Activity Status if the Activity does not meet the Performance Standard <u>Restricted</u> <u>Discretionary /</u> Discretionary Activity	Assessment Criteria Where an activity is not permitted by this R a dwelling is a Restricted Discretionary Activity a. It will be located in the Awakino Preci- b. It will be an additional dwelling on the additional dwelling is: 1.1.450m ² for a serviced site c. There is a separation distance of at lease d. There is a separation distance of at lease between two residential dwellings. Council has restricted its discretion over the
 a) After completion, it will be the only dwelling on the <i>site</i>: or b) It will be an additional dwelling on the site, and the minimum <i>net site area</i> associated with each additional dwelling is: 600m² for a <i>serviced site</i> not in an Overlay Area; or 1,000m² for a serviced site in an Overlay Area; or 3,000m² for an un-serviced site. c) There is a separation distance of at least 3m from any other detached dwelling; and d) There is a separation distance of at least 6m where there is a private open space area located between two residential dwellings. 	Discretionary /	 a dwelling is a Restricted Discretionary Activitian a. It will be located in the Awakino Precision b. It will be an additional dwelling on the additional dwelling is: 450m² for a serviced site There is a separation distance of at lead the between two residential dwellings.
 provisions of Chapter 17: Historic Heritage apply. Note 2: Each dwelling is also required to be assessed against the relevant performance Standards contained in the Plan, including within Sections 13.10 and 13.13. Note 3: For dwellings within an Outstanding Natural Landscape, Rule 13.10.3c shall also apply. Note 4: There is an exemption for Rule 13.10.3 that applies to part of Lot 2 DP 73030 Cynthia Place (Baylys Beach). See Rule 13.10.29(4). (2) Any dwelling located within a site, within the Awakino Precinct that has a road boundary shall provide: a) The primary pedestrian access oriented toward a road, and b) At least one habitable room with at least one clear-glazed window, at least 1m² in size which is oriented toward the road. 	1	 application for Resource Consent: i) The privacy, outlook and amenity of a ii) Sufficient sunlight access to the outdot iii) Building mass, orientation and passive iv) Bulk and scale effects; v) Effects on any natural features with revegetation; vi) The extent to which the activity is con Awakino Precinct; and vii) The ability to accommodate incidenta parking (if it is to be provided), manoe Where an activity is not permitted by this Rul considering an application for Resource Constition; ii) Size and shape of the <i>site</i>; iii) Extent of visual intrusion of the building places including the <i>Coastal Marine Ar</i> iv) The extent to which proposed landsca screening from adjoining public places a Design Guidelines; v) Effects on the locality, particularly reside vii) If located within an Overlay, the extent to Overlays (Chapter 4) are present on the those values; viii) Effects on landscape and heritage; viii) The extent to which the proposal will affered to the suble of th

r		1	1	
		 Note 2: The 300m radius referred to in relation to State Highways shall be measured from the position where the centreline of the road joins the State Highway. Note 3: Any changes in land use on sites that have access onto Limited Access Road's require approval from the NZ Transport Agency under the Government Roading Powers Act 1989. 		
<u>13.10.7a</u>	Fence and Landscaping	 (1) <u>Awakino Precinct</u> a) <u>Any fence is a <i>permitted activity</i> where:</u> i. <u>The fence is adjacent to any road boundary and has a maximum height of 1.2m; or</u> ii. <u>The fence is adjacent to any neighbourhood park or wetland enhancement area and has a maximum height of 1.5m and is 50% visually permeable.</u> b) <u>Any <i>building</i> or <i>dwelling</i> is a permitted activity where:</u> i. <u>The site is adjacent to the green street identified on the Awkaino Precinct Plan and 60% of the site frontage shall be vegetated to a minimum depth of .5m and a maximum height of 1.2m.</u> c) <u>Any residential activity within a site that has a legal boundary with Designation 34 is a <i>permitted activity</i> where an area of planting is provided along the entire length of the Designation 34 legal boundary which is: i. <u>2m wide; and</u> ii. <u>Capable of achieving a minimum establishment height of 1.8m; and iii.</u> <u>At a density that will achieve canopy closure within 3-5 years.</u> </u> 	Restricted Discretionary Activity	 Where an activity is not permitted by this R matters when considering and determining and itermining are i. The extent to which the fencing and wider green street. ii. The extent to which privacy is propassive surveillance of public places iii. The extent to which shading and vestreet are minimised. iv. Health and safety effects. v. The extent to which activities with activity within the residential site.
13.10.8	Separation Distance for Noise Sensitive Activities	Any Noise Sensitive Activity (as defined in Chapter 24: Definitions) is permitted if: (1) A 300m separation distance is maintained between the noise sensitive activity and activities listed as follows, on a site under separate ownership: a) Building or enclosure intended for housing livestock; b) Wastewater treatment site or other site of plant or animal effluent storage or disposal (excluding domestic disposal systems and land effluent application); c) Building used for an industrial or commercial activity, d) Intensive feed lot or feed storage area; e) Intensive feed lot or feed storage area; f) Dairying shed; g) Mining or quarrying; and h) Any other activity that has existing use rights or Resource Consent to exceed the General Noise, Use of Explosives and Blasting Standards, or a Discharge Consent relating to odour from the Northland Regional Council; and (2) The activity is setback outside the Noise Contour Boundary surrounding the Maungaturoto Dairy Factory site as shown on Planning Maps 20 and 50 (Map Series 2), except that this Rule 13.10.8(2) shall not apply to Lots 1, 2 and 3 DP 88949 (Doctors Hill Road). Note 1: This Rule is intended to protect existing, lawfully established activities in adjoining Zones. If a noise sensitive activity develops then it would be required to maintain the appropriate separation distance to avoid future land use conflicts. Note 2: Maungaturoto Dairy Factory has existing use rights for its current operations on its site. Development locating within this Zone will therefore be subject to this Rule in relation to the Maungaturoto Dairy Factory's existing operations. Note 3: For the purposes of this Rule, the term 'noise sensitive activities' is used to describe the types of activities that may be affected by sensitivity issues. Note 4: For clarity, any Noise Sensitive Activity within the Noise Contour Boundary of the Maungaturoto Dairy Factory site will require Resource Consent.	Restricted Discretionary Activity	 Where an activity is not permitted by this Rule matters when considering and determining are i) The extent to which alternative locaterii) Mechanisms in place to avoid future <i>reverse</i> physical mitigation works; iii) <i>Effects</i> on health and safety of communities iv) Any consultation with relevant property ow v) How the activity contributes to the Objectiv vi) The extent to which the internal noise level hours while at the same time providing ventilation. Where a series 2 and if applicable the extent to additional assessment criteria contained in Applicable the following additional assessment viii) The potential reverse sensitivity effect. Note 1: The operators of the Maungaturoto D any resource consent applications, in respect Note 2: A description of the landscape feature the Outstanding Natural Landscapes are description.

Rule, **Council** has restricted its discretion over the following an application for Resource Consent:

With the exception of the shared use path and pedestrian crossing, the portion of Awakino Road to be upgraded shall be limited to between the northern most propesed subdivision access point onto Awakino Read point of the precinct to 10 metres south of Paratai Place. This rule shall	For avoidance of doubt, an example of sufficient firefighting water for a si specific risks) 10,000 litres of water from sources that are: • Within 90metres of an identified building platform on each lot; and • Existing or likely to be available at a time of development of the lot; and
apply where: a. <u>The subdivision results in 125 cumulative peak hour traffic movements to</u> or from Awakino Road (approximately 139 lots); and b. The upgrades in Rule 13.13A(16) have not already occurred.	Accessible and available all year round; and May be comprised of water tanks, permanent natural waterbodies, dams, s
17. Any Awakino Road upgrade requirements under Rule 13.13A(16) shall include, but not be limited to:	
a. <u>Kerb and channel on both sides of road;</u> b. <u>Infill of existing open swale drainage;</u> c. <u>7.5-metre-wide carriageway (Face of kerb to Face of kerb);</u>	
 d. <u>1.8-metre-wide footpath on the western castern side of Awakino Road (this</u> does not apply where an existing footpath is established); e. Shared use path on the castern side of Awakino Road from the southernmost access point onto Awakino Road to Kauri Court, then to 	
Kauri Street via Kauri Court: f. <u>Pedestrian crossing facility near the primary subdivision entrance</u> intersection-where the shared use path crosses Awakino Road to Kauri	
g. <u>Re-establishment of abutting properties vehicle crossings.</u>	
Ecological Enhancement Rules:	
 Any subdivision within the Awakino Precinct where the site contains an indicative ecological feature shown on the Awakino Precinct Map 1 shall: 	
 Legally protect in perpetuity and manage on an on-going basis the ecological feature in accordance with an Ecological Enhancement and Management Plan. 	
Information Requirement:	
 When Rules 7, 8 and 10 12 - 14 13 15 apply the following information requirements shall be met: 	
 a. <u>The road layout is supported by an Integrated Transport Assessment and an</u> Urban Design Assessment. 	
 <u>The green street layout indigenous planting shall be supported by a street tree</u> planting plan. 	
20. When rule <mark>s 13-15 44-infringed apply the following information requirement shall be met:</mark>	
a. An application must be accompanied by an integrated transport assessment prepared by suitably qualified transport planner or traffic engineer. Information must be provided, detailing how the subdivision design and any methods proposed allows for the safe and efficient function of the transport	
network. This assessment shall identify of any necessary mitigation measures that will be required to address any impacts on the transport	

located to integrate with riparian margins and the Green Road

tion between open space, parks in a manner that provides between areas of open spaces.

Road being progressively upgraded to urban standards ndary;

<u>pable of safely and efficiently accommodating the traffic</u> ncluding the predicted traffic from the land which is the

ished shared path facilities

single residential dwelling will generally include (subject to site-

, swimming pools, whether located on or off the lot.

istrict Council Engineering Standards 2011 is undertaken as ource Consent application and conditions relating to be applied to the Consent as part of the engineering approval.

(1). The legal width shall be sufficient for the carriageway (including widening on curves), cul-de-sacs, footpaths and cycleways (where appropriate), parking (where appropriate), public utilities, drainage facilities, grassed Berms, Swale Drains, amenity planting, sight benching and street furniture. Roads to vest shall have sufficient legal width for planned future development. Refer to Kaipara District Council Engineering Standards 2011, clause 5.2.4.
 (2). Carriageway width is exclusive of Berms, kerb concrete and parking. Carriageway widths should be increased by up to 1.0m where there is a high proportion of heavy traffic. Additional widening is required on curves in accordance with Kaipara District Council Engineering Standards 2011 clause 5.2.5. Passing bays are required on single lane carriageways in accordance with Kaipara District Council Engineering Standards 2011 clause 5.2.5.
 (3). Carriageway surface shall be sealed in accordance with Kaipara District Council Engineering Standards 2011 clause 5.2.6.

to the same same sent distances marked " have been increased to provide for two vehicles approaching each other on a single lane carriageway to stop before colliding. If a two lane carriageway is provide for two vehicles approaching each other on a single lane carriageway to stop before colliding. If a two lane carriageway is provide for two vehicles approaching each other on a single lane carriageway to stop before colliding. If a two lane carriageway is provide for two vehicles approaching each other on a single lane carriageway to stop before colliding.

(6) Where there is potential for further development under the District Plan, the horizontal and vertical geometry and legal width shall provide for the Ultimate Development.

(7) Intersection design, public and private road design shall be carried out on accordance with Austroads guidelines, where not directly superseded by Precinct Plan Provisions.

(8) Footpath/cycleway design shall be carried out in accordance with Waka Kotahi's Pedestrian Network Guidance and Cycling Network Guidance, where not directly superseded by Precinct Plan Provisions.
