# Dargaville Connectivity Improvements

We are making it easier and safer for people to cycle and walk between Dargaville's residential area and town centre with the Kaipara Cycle Network Connections project.

Cycle lanes and shared paths will provide dedicated routes for active modes of transport, reducing emissions locally and making it easier for residents and visitors to walk, scoot, cycle to where they want to go.

## Proposed design options

There are two proposed options for what these connectivity improvements will be. Both options have been drafted to meet the requirements of the Transport Choices Programme and are based on technical assessments.

From 05 July – 04 August 2023, we asked the Dargaville community to provide feedback on these proposed designs. Feedback was gathered through community surveys, drop-in sessions and from engagement with schools, local community groups, and businesses. We'll provide an update on our channels once the feedback has been reviewed.

## Background

The Kaipara Cycle Network Connections project is funded by the Transport Choices package, which is part of the Waka Kotahi Climate Emergency Response Fund (CERF) programme.

We are focusing on the areas including, Charlotte Street south to Victoria Street, Hokianga Road east to Awakino Road, and Awakino Road east to Onslow Street.

## About the Transport Choices Programme

The Transport Choices Programme aims to provide people with more transport options and create healthier, safer environment for communities across Aotearoa New Zealand. The Government is investing \$348 million into the programme, which is part of the Climate Emergency Response Fund programme.

The funding will help Councils progress make small, quick and visible changes to our streets and the way people use them by helping them embrace cycling or walking as a means of transport. This transport system is sustainable for the next generation.
