**Submission Point 61.1**

This development is one of very few developments that has considered environment impacts and outcomes for the land & community. The future focused nature of these plans will, in my view, make this development an asset to the community.

The proposed environmental initiatives including onsite electrical generation, land restoration, forest enhancement and protection, as well as considerations for a community owned food forest, make this development a stand out at both national & international scales.

Furthermore, I believe densification of land near residentially zoned land is more sensitive to land use productivity & access to infrastructure.

**Example - supports the growth of Mangawhai**
