There would be more pressure on the harbour with so many more dwellings. It would unavoidably become more polluted with earth and plant removal. Already we see the silt coming down the harbour with the increased subdivision. The harbour will require more dredging. The increased activity of power boats and water activities would also make the harbour unsafe for swimmers. The infrastructure could not cope with the extra traffic and waste coming from more housing. As the sand dunes lose more sand, the land could become flood prone and insurance companies would be reluctant to insure properties. Then it would fall on the rate payers. The proposal will only benefit the subdividers who once finished with the subdivision will not be around to mitigate the damage done. It is a short sighted and dangerous proposal the Council must decline for the future of the coastal town.
