2. Council's contractor will provide the meter and install onto an existing connection at the boundary.

Council's contractor will only make the physical connection to the Council main and install the toby valve and water meter. The applicant will carry out all other physical works.

3. This section applies where applicable to all connections:
- a. Where a larger meter is required, a quote will be obtained from Council's contractor. This quoted cost plus 15% shall be paid to Council prior to work commencing.
 - b. Where a connection is not straightforward (e.g. crossing a road or lifting cobblestones) a quote will be obtained from Council's contractor. The quoted cost plus 15% shall be paid to Council prior to work commencing.
 - c. Where land is being subdivided, it is the subdivider's responsibility to provide a water connection to each lot and connect the development's water supply reticulation system to the public system. In all cases connection to the Council main shall be done by Council's contractor and payment shall be made directly by the subdivider to Council's contractor.
 - d. Council expects payment to be made when submitting the application to the Council offices. Exceptions will be non-straightforward connections where a quote is needed from contractors to inform applicant of connection costs. If this is the case Council will contact the applicant in regard to payment. Please note no connection will be scheduled in with contractors until payment has been made.
